

DASHBOARD & REPORTING SPECIFICATION

Project: Retail Order Management & Refund Process Improvement

Document: Dashboard & Reporting Specification

Version: 1.0

A. PURPOSE

Define the key dashboards, KPIs, filters, and reporting views required to monitor the retail order and refund process.

The dashboard should provide a single, easy-to-understand view of operational performance.

B. DASHBOARD OBJECTIVES

The dashboard should help users:

- Monitor order volumes and status
- Track shipments and deliveries
- Monitor returns and refunds
- Identify operational exceptions
- Track key performance indicators
- Support faster management decisions

C. MANAGEMENT DASHBOARD

Key KPIs

KPI	Purpose
Total Orders	Overall order volume
Pending Orders	Orders requiring action
Delivered Orders	Completed deliveries
Return Rate	Percentage of orders returned
Refund Rate	Percentage of orders refunded

KPI	Purpose
Pending Refunds	Refunds requiring action
Avg. Processing Time	Measures operational efficiency

Recommended Visuals

- KPI cards for summary metrics
- Order volume trend
- Order status breakdown
- Return and refund trend
- Pending items summary

D. OPERATIONS VIEW

Focuses on order processing.

Metrics:

- Total Orders
- Pending Orders
- Completed Orders
- Delayed Orders

Visuals:

- Order status breakdown
 - Monthly order trend
 - Pending order table
-

E. RETURNS & REFUNDS VIEW

Focuses on post-delivery activities.

Metrics:

- Total Returns
- Return Rate
- Pending Returns
- Total Refunds
- Pending Refunds
- Average Refund Processing Time

Visuals:

- Return trend
 - Refund trend
 - Refund status breakdown
 - Pending refund table
-

F. FILTERS

Users should be able to filter dashboard information by:

- Date
- Order Status
- Return Status
- Refund Status
- Department

Filters should update the relevant KPIs and visualizations.

G. EXCEPTION REPORTING

The dashboard should highlight records requiring attention.

Examples:

Delayed Orders

Orders that have exceeded the expected processing or delivery time.

Pending Returns

Returns that have not yet been completed.

Pending Refunds

Eligible refunds that have not yet been processed.

The purpose is to help users focus on exceptions rather than manually reviewing every transaction.

H. REPORTING REQUIREMENTS

The solution should support:

- Daily operational reporting
- Monthly performance reporting
- Order status reporting
- Return reporting
- Refund reporting
- Management KPI reporting

Reports should use consistent definitions and validated data.

I. USABILITY REQUIREMENTS

The dashboard should:

- Use simple and consistent terminology
- Keep important KPIs visible
- Avoid unnecessary visualizations
- Clearly distinguish normal and exception conditions
- Allow users to drill into relevant details

- Be understandable to non-technical business users
-

J. EXPECTED OUTCOME

The dashboard should transform operational data into actionable information.

RAW DATA → KPIs → EXCEPTIONS → BUSINESS INSIGHT → ACTION

The primary objective is not to display more data, but to help users identify what requires attention and why.
